oculus FOR BUSINESS

TRANSFORM WORK WITH VIRTUAL REALITY.

Eliminate physical barriers and discover powerful new ways to train, collaborate, and boost productivity with VR on Oculus for Business. The platform is built on an enterprise-grade infrastructure that adheres to stringent data security standards, and it provides straight forward device management and advanced support so it's easy to adopt and scale throughout your organization.

OCULUS FOR BUSINESS

Key benefits for business

No PC. No wires. No limits.

Our industry-leading VR headset, Oculus Quest 2, offers untethered freedom to move and interact with virtual environments. Designed with enhanced performance and ergonomics, the Quest 2 is lightweight and can be paired with our new Elite Strap with Battery to extend battery life and improve comfort for longer work sessions. It has a higher-resolution display and faster processing than the original Quest, so text is more crisp, complex models and experiences load quickly, and more people can collaborate in VR sessions. There are no distracting consumer features, and your company controls the content. We've built everything to ensure that your employees feel transported and stay immersed in their work.

Drive real impact and ROI with immersive collaboration and learning.

Whether you're bringing your team together to collaborate, onboarding new hires, developing L&D curricula, or teaching critical safety procedures, effective teamwork and training are essential to the health of your organization. With Oculus for Business, your employees can work and learn more effectively together in virtual meeting spaces where they can share screens, sketch out ideas on whiteboards, and visualize data. They'll have the opportunity to fully engage in each collaboration and learning experience and emerge more connected, knowledgeable, and

confident. They'll also have the potential to contribute higher-quality work, retain information longer, and help drive better business results.

Keep your data secure and private.

The security of your IP and other company data is essential to your success. That's why we built Oculus for Business on the enterprise-grade security infrastructure and privacy practices of the Workplace from Facebook platform. Oculus for Business uses Workplace account management and access control tools, and it offers business IDs so employees don't need to use their personal Facebook credentials. The platform leverages Workplace data center security controls, multiple layers of encryption, 24/7 threat-monitoring, and advanced technologies to help ensure data privacy and security.

Get the support you need to stay productive.

Your business-critical technology needs to run smoothly so you can keep making progress toward your goals. Oculus for Business offers exceptional hardware and software support via chat, email, and phone, and headsets come with extended 24-month hardware warranties.
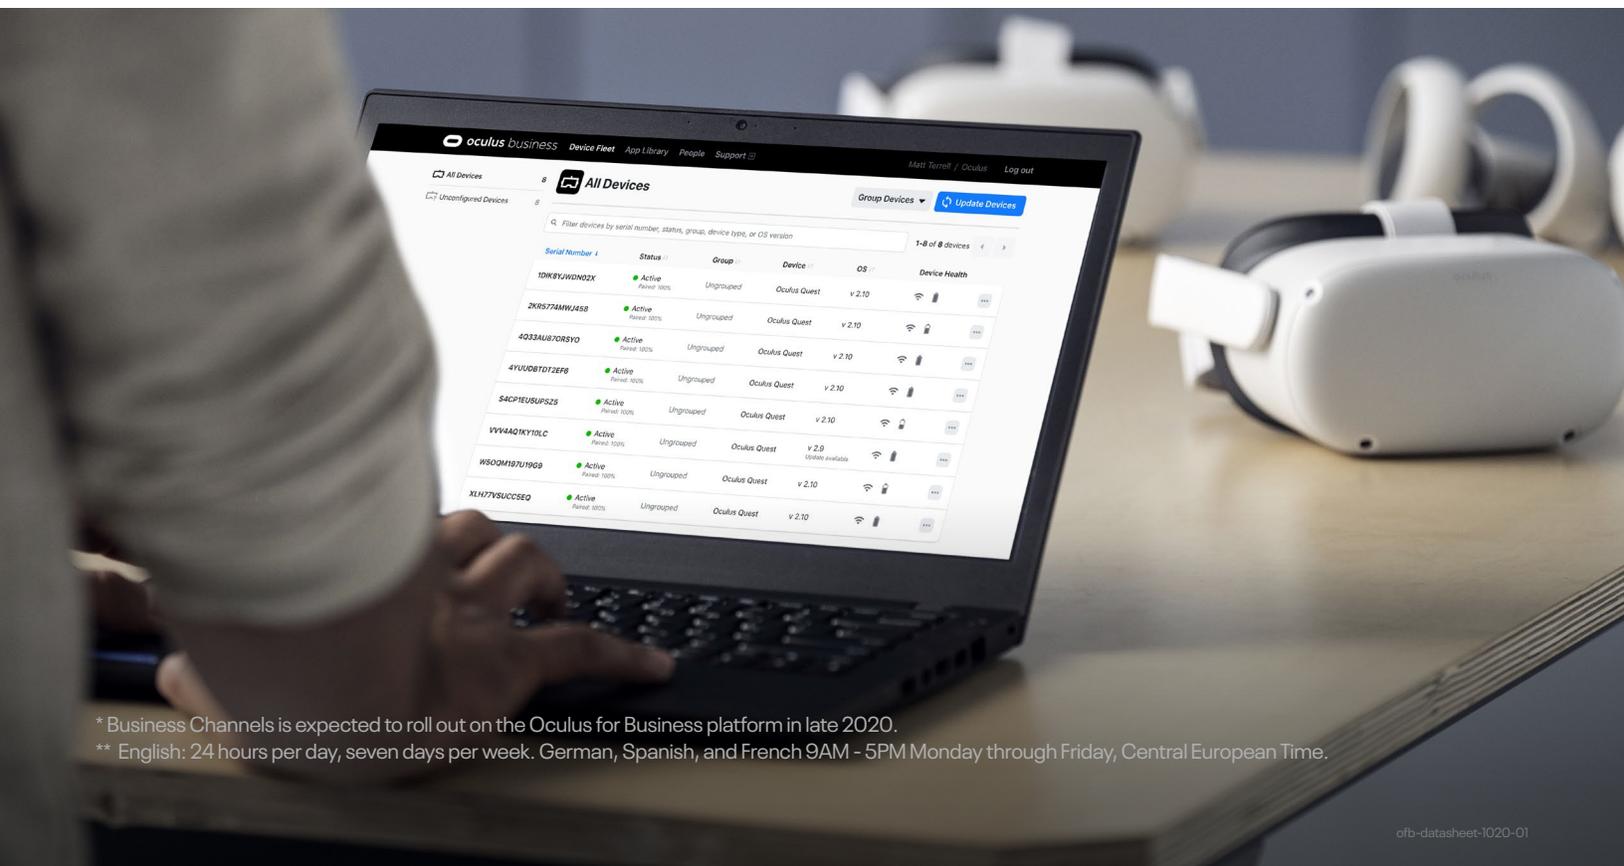

Key features for business

⬈ Scalable

- **Device setup app for Android** lets you provision multiple headsets in just a few steps.

- **Device Manager** shows the status on each headset and lets you deploy devices, change settings, group devices and bulk-apply settings, manage controllers across devices, and more.

- **Business Channels*** will allow your ISVs to deliver VR applications directly to your headsets while still giving your admins control of their deployments.

- **Ability to disable Guardian** allows for seated VR sessions to streamline setup and simplify the experience for users.

⚭ Reliable

- **Oculus for Business** is built on Workplace from Facebook and adheres to strict security standards, which are continuously reviewed and improved.

- **24/7 Advanced customer support**** includes hardware and/or software support via chat, email, and phone.

- **Extended 24-month hardware warranties** and rapid exchange for faulty devices offer peace of mind.

⊞ Professional

- **In-headset UI** puts the focus on the VR experience.

- **Hand tracking** enables users to interact with VR content in more natural, intuitive ways —no need for controllers.

- **An enterprise app launcher** showcases only the apps you've installed.

- **Kiosk mode** enables admins to launch users into a single experience.

- **There are no distracting consumer features** like store or video apps.

* Business Channels is expected to roll out on the Oculus for Business platform in late 2020.
** English: 24 hours per day, seven days per week. German, Spanish, and French 9AM - 5PM Monday through Friday, Central European Time.

The VR solution for your business

⊘ oculus QUEST 2

MSRP $799 USD (256GB)
includes extended 2-year warranty and one year of the Oculus for Business software platform with premium support †

Hardware Features

Fluid freedom of movement

Built-in Oculus Insight tracking instantly translates your real-world movement and gestures without additional sensors.

Natural, intuitive control

State-of-the-art ergonomics meet ease-of-use in controllers that transport your hand gestures and actions into VR, while hand tracking makes interactions even more natural.

More power for better productivity

With a higher-resolution display and faster processing than Oculus Quest, text is more crisp, complex models and experiences load quickly, and more people can collaborate in your VR sessions.

Oculus for Business Platform
